WORK

ULTIMATE SOFTWARE

Spring 2018

Software Engineering Intern - Weston, FL
Description pending completion of internship.

PROJECTS

TEXTBOOKSCITY.COM

Summer 2017

Developed textbook price comparison site using Node.js. Compared prices across 15+ vendors (Amazon, Chegg, etc.). Created internal book price API using Node and Express. Implemented frontend sorting using Angular and Bootstrap. Received 5000 unique visitors in August 2017.

STOCKROCKET.IO

Summer 2017

Created real-time stock module and developed stock breakout algorithm using Node.js, Socket.io, React.js, and Heroku. Gathered stock data and news using Express, Cheerio, and Request.

FLASH

Fall 2016

Developed mobile iOS application that generates quick and quality recommendations on restaurants, cafes, and bars nearby. Created location recommendations using Google Places and Maps API. Implemented full authentication and database using Swift and Firebase.

ORGANIZATIONS

ASSOCIATION OF COMPUTING MACHINERY

Fall 2017

HackUTD Logistics Coordinator

Coordinated HackUTD events and venue layout. Planned hackathon schedule, building safety, and logistics.

USER EXPERIENCE CLUB

Fall 2017

Officer of Student Engagement

Managed social media presence and marketing. Helped organized club events and gathered student feedback. Conducted promo events as well as class visits to promote UX and design.
