## PROJECTS

### Textbookscity.com

Summer 2017

Developed textbook price comparison site to help students find the cheapest deals on books. Compares and sorts prices across 15+ vendors including Amazon, Chegg, Barnes & Noble, and Abebooks. Also created API to gather book info and price listings.

- Technologies Used: Node.js, Express, Angular, Bootstrap, Heroku

### Flash

Summer 2016 - Fall 2016

Developed mobile iOS application to easily and quickly get quality recommendations on restaurants, cafes, and bars nearby at a click of a button. Implemented full account authentication and database, allowing users to keep track of their preferences and recommendations.

- Technologies Used: Swift, Firebase, Google Places API, Google Maps API

### Wildre.com

Summer 2016 - Winter 2016

Founded Wildre Shirt Co., a T-shirt company which donates to the WWF, and designed/ developed ecommerce site wildre.com.

- Technologies Used: HTML/CSS, jQuery, Bootstrap, Shopify API

### Marko

Summer 2016 - Winter 2016

Helped develop interface for web application that personalizes in-store shopping experiences/provides analytics using facial recognition to create unique profiles for shoppers. ~Money2020 Hackathon, Las Vegas

- Technologies Used: HTML/CSS, JavaScript

### Chrishuynh.com

Developed personal site using HTML, Sass, and JavaScript.

## EDUCATION

The University of Texas at Dallas

B.S. Computer Science

3.75 GPA, Graduating May 2019
