WORK

Ultimate Software, Software Engineering Intern

Spring 2018 - Weston, FL

• Description pending completion of internship

PROJECTS

Textbookscity.com

Summer 2017

• Developed textbook price comparison site using Node.js
• Received 5000 unique visitors in August 2017
• Sorted and compared prices across 15+ vendors (Amazon, Chegg, etc.)
• Created internal book data/price API with Heroku and Express
• Implemented front-end with Angular and Boostrap
• Utilized Amazon Product Advertising API, scrapers built with Request and Cheerio, and external book APIs

Stockrocket.io

Summer 2017

• Created real-time stock module & developed stock breakout algorithm using Node.js, Socket.io, and React.js
• Gathered stock data and news using Express, Cheerio, and Request
• Deployed algorithm back-end using Heroku and MongoDB
• Implemented module front-end with React.js, Bootstrap, and jQuery
• Created real-time prices updates with Socket.io

Flash

Summer 2016 - Fall 2016

• Developed mobile iOS application that generates quick and quality recommendations on restaurants, cafes, and bars nearby
• Created location recommendations using Google Places and Maps API
• Implemented full authentication and database using Swift and Firebase

ChrisBot

Fall 2016

• Developed IRC chatbot that provides trending Twitter tags, local weather, and jokes using Java, PircBot, Twitter API, and external weather/joke APIs
• Parsed JSON results using Java GSON library

EDUCATION

The University of Texas at Dallas
B.S. Computer Science
3.75 GPA, Graduating May 2019

PROFILES

🏠 chrishuynh.com
