PROJECTS

Textbookscity.com, Dallas — *Full Stack Software Engineer*

Summer 2017

Developed textbook price comparison site to help students find the cheapest deals on books. Compares prices across 15+ vendors including Amazon, Chegg, Barnes & Noble, Abebooks, and much more.
- Developed textbook price API using Node.js, Express, and Heroku
- Created parsing and sorting algorithms to gather book data for API
- Implemented front-end with Angular and Bootstrap
- Designed with Adobe XD

Flash, Dallas — *Full Stack Software Engineer*

Summer 2016 - Fall 2016

Developed mobile iOS application allowing users to quickly make choices on places to eat, cafes, bars, etc.
- Implemented Google Places API to create restaurant recommendations and suggestions based on current location
- Implemented authentication and data handling using Swift and Firebase
- Created algorithm to sort API results and match locations to user's preferences/filters
- Handled all design work from inception to growth via Adobe XD

Wildre Shirt Co, Dallas — *Founder*, *Web Developer*

Summer 2016 - PRESENT

Designed and developed ecommerce site wildre.com using HTML, CSS, and Javascript with the implementation of jQuery, Bootstrap, and Shopify API.

Marko (Money2020 Hack), Las Vegas — *Front-End Developer*

Fall 2015

Designed interface for web application with HTML, CSS, and Javascript that personalizes in-store shopping experiences/provides analytics using facial recognition to create unique profiles for shoppers.

Chrishuynh.com

Developed personal site using HTML, Sass, and JavasScript
